The *Journal of Forensic Nursing* is the official journal of the International Association of Forensic Nurses. This quarterly journal covers all facets of this worldwide multidisciplinary nursing specialty and brings health care, law enforcement, legal issues, and forensic science into the patient care context. Content comes from empirical studies, review and theoretical articles, methodological papers, and case studies on topics such as interpersonal violence, death investigation, legal and ethical issues, forensic psychiatric nursing, correctional nursing, and emergency/trauma. *Journal of Forensic Nursing* is indexed by MEDLINE, CINAHL, ProQuest and PsycINFO. All issues of the journal back to 2005 are available online from Wiley Online Library, which took over publishing the journal in 2008.

On the Edge. v. 1, International Association of Forensic Nurses, 1995.
<http://www.iafn.org>
ISSN: None
Indexed in: CINAHL
Recommended for: Hospital, Academic Libraries

This quarterly peer-reviewed newsletter is focused on forensic nursing and its clinical application. Each issue offers feature articles and several regular columns—letters, education and training, focus on personalities, global updates, tips and tricks, research briefs, and member news. Librarians will find its book reviews very helpful. The features cover basic topics such as grieving and death investigation as well as examine current issues

such as organ donation and forensic nursing. The complete run is indexed by CINAHL with full text in EBSCOhost from March 1, 2007 to present. The newsletter website provides free full text from volume 6 (2000) onwards.

13.5. Geriatric Nursing

Nursing care of the aged patient given in the home, the hospital, or special institutions such as nursing homes, psychiatric institutions, etc.

Contributor: Marcia Henry

Monographs

Advanced Practice Nursing with Older Adults: Clinical Guidelines. Editors: Valerie T. Cotter, Neville E. Strumpf. McGraw-Hill, 2002.

ISBN: 9780071341578

Recommended for: Hospital, Academic Libraries
Doody's Core Titles Selection

The work's 30 contributors offer guidelines for geriatric care for the advance practice nursing student. This practical text features guide lines, strategies, protocols, and principles for working with older adults. The book, which is organized by body system, provides essential coverage of diagnosis, treatment standards, management, special concerns, judgment calls, and more. Unique coverage is provided for pain management, care for the dying, palliative care, and advance directives. The contributors offer practical assistance with the evaluation and treatment of cardiovascular, respiratory, genitourinary, gastrointestinal, thyroid, gynecological, musculoskeletal, and CNS disorders, as well as diabetes mellitus. Also provided is in-depth guidance on problems such as falls, sensory deficits, pressure injuries, and elder abuse and neglect. *Advanced Practice Nursing with Older Adults: Clinical Guidelines* is considered an essential purchase by *Doody's Core Titles*.

Elder Abuse Detection and Intervention: A Collaborative Approach. Authors: Bonnie Brandl, Carmel Bitondo Dyer, Candace J. Heisler, Joanne Marlatt Otto, Lori A. Stiegel, Randolph W. Thomas. Springer, 2007.

ISBN: 9780826111036

ISBN: 9780826111050 (Online)

Recommended for: Hospital, Academic Libraries

Doody's Core Titles Selection

This title is a valuable resource for all nurses caring for hospitalized, older adults. It is the third edition of the book formerly titled *Geriatric Nursing Protocols for Best Practice*. The protocols address key clinical conditions and circumstances likely to be encountered by hospital nurses caring for older adults. They represent best practices for acute care of the elderly, practices that are developed by nursing experts around the country as part of the Hartford Foundation's Nurses Improving Care to the Hospitalized Elderly (NICHE) project. This third edition includes 17 revised and updated chapters and more than 15 new topics including critical care, diabetes, hydration, oral health care, palliative care, and substance abuse. Each chapter includes educational objectives, problem assessment, nursing intervention or care strategies, and references; most chapters include case studies. *Doody's Core Titles* recommends this as an essential purchase title.

Gerontologic Nursing. 4th ed. Editor: Sue E. Meiner.

Mosby/Elsevier, 2011.

<http://www.nursingconsult.com/>

ISBN:9780323069991

Recommended for: Hospital, Academic Libraries

Brandon/Hill, *Doody's Core Titles* Selection

With 22 contributing authors, the third edition of this valuable work covers health promotion and the most common medical-surgical problems associated with the older adult. It is divided into six parts with coverage of essential wellness and disorders information. The second edition was a Brandon/Hill geriatric nursing selection. This review refers to the third edition. A fourth edition by Sue Meiner was released in late 2010. A new chapter on "Loss and End-Of-Life Issues" has been included along with new features such as updated nursing care plans linked to NANDA-I (North American Nursing Diagnosis Association International) nursing diagnoses, NIC (nursing interventions classification) priority interventions for specific conditions, and NOC (nursing outcomes classification) suggested outcomes to guide appropriate care.

Gerontological Nursing. 7th ed. Author: Charlotte Eliopoulos. Wolters Kluwer Health/Lippincott Williams

& Wilkins, 2010.

ISBN:9780781753449

Recommended for: Hospital, Academic Libraries

Brandon/Hill Selection

The seventh edition of *Gerontological Nursing* is written by Charlotte Eliopoulos, the founder of the American Association for Long-Term Care Nursing. It is arranged into units: "Understanding the Aging Experience," "Foundations of Gerontological Nursing: 'Fostering Connection and Gratification,'" "General Care Concerns," "Facilitating Physiologic Balance," "Multisystemic Disorders," and "Gerontological Care Issues." There are special indexes for assessment guides and nursing care plans. An earlier edition was a Brandon/Hill selection.

Gerontological Nursing: Competencies for Care. 2nd ed.

Editor: Kristen L. Mauk. Jones & Bartlett, 2010.

ISBN:9780763755805

Recommended for: Hospital, Academic Libraries

Written to help students learn about evidence-based practice in gerontological nursing, this publication was awarded the *American Journal of Nursing's* 2009 Book of the Year Award. Forty authors contributed to *Gerontological Nursing: Competencies for Care*. Key features of the text include chapter outlines, learning objectives, discussion questions, personal reflection boxes, and case studies.

Handbook of Geriatric Assessment. 4th ed. Editors:

Joseph J. Gallo, Hillary R. Bogner, Terry Fulmer, Gregory

J. Paveza. Jones & Bartlett, 2006.

<http://extranet.netlibrary.com/TitleSelect/>

<http://www.r2library.com/>

ISBN:9780763730567

ISBN:9781435603318

Recommended for: Hospital, Academic Libraries

The *Handbook of Geriatric Assessment* presents instruments for use in many aspects of geriatrics and describes how to *use* a team approach to manage older adults. It is not meant to be a comprehensive guide to all assessment instruments; instead, it provides instruments, questionnaires, and concepts that can be employed in designing clinical assessment procedures. The book is organized into four sections: "The Context of Assessment" (geriatric care, emergency, ethnicity, older adult driver, advance directive, mistreatment); "Domains of Assessment" (cognitive, depression, substance use and abuse, activities of daily living, social assessment, physical, pain, health promotion); "Settings of Assessment" (home, nursing home, hospitalization); and "Specialty Topics" (adherence to medical treatment, teams, disaster preparedness and response). The *Handbook of Geriatric*

Assessment won a 2006 *American Journal of Nursing* Book of the Year Award.

Brandon/Hill, *Doody's Core Titles* Selection

First published in 1985 as *Principles of Geriatric Medicine*, this work is often cited by reviewers as the best geriatrics book. *Hazzard's Principles of Geriatric Medicine and Gerontology* is now in its sixth edition, complete with updated content and a design overhaul that makes it easier to read and navigate. Its main focus of blending gerontology principles with clinical geriatrics, however, is unchanged. This brand new package, authored by the world's best geriatricians, contains a number of changes. Evidence-based medicine is emphasized through the expanded use of clinical practice guidelines, as well as references to systematic reviews and critically appraised topics. The editors have also added a new chapter on international geriatric care. Meanwhile, tables, drawings, and clinical algorithms have been enhanced by the new color format, and all content on geriatric syndromes has been placed at the front of the work. The 2003 Brandon/Hill list selected the fourth edition of *Principles of Geriatric Medicine and Gerontology* (1999) for its geriatrics category.

Matteson and McConnell's Gerontological Nursing: Concepts and Practice. 3rd ed. Authors: Adrienne D. Linton, Helen W. Lach. Saunders/Elsevier, 2007.

ISBN:9781416001669

Recommended for: Hospital Libraries

This book provides a background on gerontology and normal aging changes, practical assessment instruments, and research-based reviews of clinical topics. It supplies evidence-based guidelines for the care of older adults.

Chapters address gerontological nursing roles and leadership, including interdisciplinary collaboration, case management, end of life, and health promotion concepts. This book is a comprehensive reference for all nurses with an interest in the care of older adults.

Reichel's Care of the Elderly: Clinical Aspects of Aging. 6th ed. Editors: Christine Arenson, Jan Busby-Whitehead, Kenneth Brummel-Smith, James G. O'Brien, Mary H. Palmer, William Reichel. Cambridge University Press, 2009.

Recommended for: Hospital, Academic Libraries

Brandon/Hi ll, *Doody's Core Titles* Selection

The sixth edition of *Reichel's Care of the Elderly* offers new topics in the clinical management of the geriatric patient: hormonal therapy in postmenopausal women, drug therapy for Alzheimer sufferers, alternative medicine, the chronic understaffing of nursing homes, management of delirium, and ethical issues. The targeted audience is the geriatric specialist, as well as the medical and allied health practitioner who needs practical and relevant information in a comprehensive format.

Toward Healthy Aging: Human Needs and Nursing Response. 7th ed. Authors: Priscilla Ebersole, Patricia Hess, Theris Touhy, Kathleen Jett, Ann S. Luggen. Mosby/Elsevier, 2008.

ISBN: 9780323047302

Recommended for: Hospital, Academic Libraries

Brandon/Hill, *Doody's Core Titles* Selection

Toward Healthy Aging serves as a comprehensive resource on health promotion and maintenance for older adults, their families, and caregivers. According to the publisher's description, the book "includes the most current information you need to provide effective holistic care, promote healthy lifestyle choices, and address end-of-life issues. Grounded in the core competencies recommended by the AACN (American Association of Critical-Care Nurses) in collaboration with the Hartford [sic] Institute for Geriatric Nursing and using Maslow hierarchy of needs, this book includes complete coverage of both common and uncommon conditions in the older adult. *Toward Healthy Aging* also highlights key aging issues with sections devoted to basic physiologic

needs, safety and security, the need to belong, self-esteem, and self-actualization!' This best seller is a former Brandon/Hill nursing book recommendation and is currently a *Doody's Core Titles* purchase recommendation within the nursing clinical specialties geriatrics section.

Age and Ageing is the medical journal of the British Geriatrics Society. It covers biological gerontology and geriatrics, including research on aging and the clinical, epidemiological, and psychological aspects of medicine in old age. Current issues include the following sections: editor's view, editorial, report, news and reviews, commentary, review, research papers, research letters, case reports, letters to the editor, and book reviews.

Archives of Gerontology and Geriatrics. v. 1, Elsevier, 1982.

ISSN: 01674943

Indexed in: MEDLINE, CINAHL

Recommended for: Hospital, Academic Libraries

The *Archives of Gerontology and Geriatrics* is an international journal integrating experimental, clinical, and social studies on aging. The principal aim of the journal is to facilitate the exchange of information between gerontological research specialists in experimental gerontology, clinical geriatrics, and social geriatrics. The journal accepts experimental papers dealing with the basic mechanisms of aging at the molecular, cellular, tissue, or organ levels. Also accepted are clinical papers providing new information and papers dealing with anti-aging pharmacological preparations in humans. Articles addressing the social aspects of geriatrics are accepted if they are of general interest to the epidemiology of aging and the efficiency and working methods of the social organizations for the health care of the elderly.

Brandon/Hill Selection

Geriatric Nursing offers clinical information and management advice relating to the care of older adults. The journal's peer-reviewed articles report the latest developments in the management of acute and chronic disorders and provide practical advice on the care of older adults across the long-term continuum. *Geriatric Nursing* addresses current issues related to drugs, advance directives, staff development and management, legal issues, client and caregiver education, infection control, and other topics. The journal is written specifically for nurses and nurse practitioners who work with older adults in any care setting. *Geriatric Nursing* is the official journal of the American Assisted Living Nurses Association (AALNA), National Gerontological Nursing Association (NGNA), Gerontological Advanced Practice Nurses Association (GAPNA), and the Nurses Improving Care for Healthsystem Elders (NICHE). In addition to subject-based articles written by and for practicing nurses and nursing students, there is information for the practitioner such as educational classes, financial grants, and awards. Continuing education credit exams are included in each issue, along with association news and event calendars. In addition to nurses and nurse practitioners, the journal is suitable for medical and academic libraries with nursing programs. It was an initial purchase recommendation on the Brandon/Hill nursing list.

International Journal of Older People Nursing. v. 1, Wiley-Blackwell, 2006.

[http://onlinelibrary.wiley.com/journal/10.1111/\(ISSN\)1748-3743](http://onlinelibrary.wiley.com/journal/10.1111/(ISSN)1748-3743)

ISSN: 17483743 (Online)

Indexed in: MEDLINE, CINAHL

Recommended for: Hospital, Academic Libraries

Begun in 2004 as supplemental issues to the *Journal of Clinical Nursing*, this publication was issued separately beginning with volume 1 in 2006. The *International Journal of Older People Nursing* is a peer-reviewed, scholarly journal. This quarterly publication aims to "challenge assumptions and provoke new ideas" to help nurses develop and inform their practice and engage in the debates about the health and social care services for older people. The journal consists of two sections. The first part publishes scholarly, peer-reviewed original articles, and the second part forms a practice development section, which is also peer-reviewed. Within the practice

development section are three commissioned scholarly papers: literature scan, application to practice, and a review paper. Each issue features practice development on a key aspect of older people nursing of relevance to all nurses. The journal is indexed by CINAHL, PsycINFO, and MEDLINE. Wiley Online Library offers the complete, full text; CINAHL Plus with Full Text offers access with a one-year embargo.

Journal of Gerontological Nursing. v. 1, SLACK, 1975.

<http://www.jognonline.com/>

ISSN: 00989134

ISSN: 1938243X

Indexed in: MEDLINE, CINAHL

Recommended for: Hospital, Academic Libraries

The *Journal of Gerontological Nursing* covers all aspects of gerontological nursing with original clinical articles and the latest research. The *Journal of Gerontological Nursing* is a monthly, peer-reviewed journal that publishes clinically relevant, original articles on the practice of gerontological nursing across the continuum of care in a variety of health care settings. The major sections, which are not necessarily included in every issue, are: original feature articles (clinical or review articles), continuing education, "Geropharmacology," "Assessment," "Clinical Outlook;" "Genetics and Gerontology;" "Geropsychiatry;" "Healthy Aging," "Innovations in Community-based and Long-term Care;" "Interdisciplinary Care;" "Legal Issues," "Multicultural Aging," "Public Policy," "Research Briefs;" and "Technology Innovations;" Other regular features include news, letters to the editor, book and media reviews, future events, artwork, photos, editorials, and the continuing education quiz. The journal is cited in several abstracting and indexing services such as MEDLINE, CINAHL, AGELINE, Web of Science, Scopus, and Google Scholar.

Brandon/Hill Selection

The *Journal of the American Geriatrics Society* is a peer-reviewed, monthly journal covering common diseases and disorders of older adults. Its articles are relevant to the clinical care of the elderly. It covers the principles of aging, biology, psychosocial aspects, pharmacology, legal

and ethical issues, and health care finance. Articles also address the approach to the older patient: hospital-based and community-based geriatric care, nursing home care, geriatric assessment, preventive geriatrics, physical activity, rehabilitation, palliative care, and alternative medicine. The journal covers such geriatric syndromes as dementia, delirium, urinary incontinence, hearing and vision impairment, malnutrition, eating and feeding problems, osteoporosis and osteomalacia, falls and gait disturbances, dizziness and syncope, pressure ulcers, and sleep disorders. Within the area of geriatric psychiatry, it accepts articles on depression and other mood disorders, anxiety disorders, psychotic disorders, personality/somatoform disorders, substance abuse, and mental retardation. Finally, the journal addresses a wide range of geriatric diseases and disorders including cardiovascular diseases, hypertension, musculoskeletal diseases, back pain, diseases and disorders of the foot, neurologic diseases, infectious diseases, respiratory diseases, oral diseases, gastrointestinal disorders, endocrine and metabolic disorders, diabetes, hormone replacement therapy, gynecologic diseases and disorders, disorders of sexual function, hematologic diseases and disorders, oncology, renal diseases, prostate disease, and dermatologic diseases. The journal is indexed in a wide range of sources such as MEDLINE, Chemical Abstracts, AGELINE, CINAHL Plus, PsycINFO, Biological Abstracts, several social science indexing and abstracting services, Google Scholar, Scopus, and Web of Science. Wiley Online Library provides full online coverage back to volume 1.

Brandon/Hill Selection

Begun in 1946 as the *Journal of Gerontology*, the *Journals of Gerontology. Series A* started publishing peer-reviewed, original scientific and research papers on the biological and medical aspects of aging under this separate title in 1995. The pertinent "Medical Sciences" section includes "articles representing the full range of medical sciences pertaining to aging. Appropriate areas include, but are not limited to, basic medical science, clinical epidemiology, clinical research, and health services research for professions such as medicine, dentistry, allied health sciences, and nursing. It publishes articles on research pertinent to

human biology and disease. The following types of articles are published: (1) articles reporting original research; (2) rapid communications; (3) review articles; (4) guest editorials." The journal is widely indexed in such databases as MEDLINE, CINAHL, AGELINE, Web of Science, Scopus, and Google Scholar.

Journals of Gerontology. Series B, Psychological Sciences and Social Sciences. v. SOB, Oxford/Gerontological Society of America, 1995.

Brandon/Hill Selection

Began in 1946 as the *Journal of Gerontology*, the *Journals of Gerontology. Series B* began in 1995 as the companion journal to *Journals of Gerontology. Series A, Biological Sciences and Medical Sciences*. Similar to Series A, Series B is divided into two parts, each with separate pagination: "Psychological Sciences" and "Social Sciences." "Psychological Sciences" covers applied, clinical, counseling, developmental, experimental, and social psychology related to aging and the elderly. Articles are expected to demonstrate the theoretical or methodological implications of the research results reported. They may also relate psychological aspects of aging to other disciplines. Four types of articles are included: lengthy articles on original research, brief reports on original research, invited reviews and position papers, and articles on theory or methodology. The second section, "Social Sciences," covers topics related to aging in various social science disciplines, such as anthropology, demography, economics, epidemiology, geography, political science, public health, social history, social work, and sociology. Five types of articles are included in this journal: lengthy articles on original research, brief reports on original research, letters to the editor, review articles, and articles on theory or methodology. The journal is widely indexed in such databases as MEDLINE, CINAHL, PsycINFO, Web of Science, Scopus, and Google Scholar.

Nursing Older People. v. 12, RCN Publishing, 2000.

<http://nursingolderpeople.rcnpublishing.co.uk>

ISSN: 14720795

Indexed in: MEDLINE, CINAHL

Recommended for: Hospital, Academic Libraries

This journal began in 1981 as the *British Journal of Geriatric Nursing* and experienced multiple title changes.

Currently known as *Nursing Older People*, this professional trade journal is issued 10 times a year. The publication contains news analysis, nursing practice, clinical and research articles, book and journal reviews, and conference listings. It is widely indexed in such databases as MEDLINE, CINAHL, and several EBSCOhost and Gale databases.

Research in Gerontological Nursing. v. 1, SLACK, 2008.

<http://www.geronurseresearch.com>

ISSN: 19382464

ISSN: 19404921

Indexed in: MEDLINE, CINAHL

Recommended for: Hospital, Academic Libraries

Research in Gerontological Nursing is a peer-reviewed, interdisciplinary gerontological nursing research journal for educators, academicians, clinicians, and policymakers involved with older adults in all health care settings. This bimonthly journal is indexed in several databases such as MEDLINE, CINAHL, and AGELINE.

13.6. Holistic Nursing

A philosophy of nursing practice that takes into account total patient care, considering the physical, emotional, social, economic, and spiritual needs of patients, their response to their illnesses, and the effect of illness on patients' abilities to meet self-care needs.

-MeSH

Contributor: Paul M. Blobaum

Monographs

Healing with Alternative and Complementary Therapies 2000. Author: Lynn Keegan. Delmar Thomson Learning, 2001.

ISBN: 076681890X

Recommended for: Hospital, Academic Libraries

Keegan has written several books on the nurse as healer since the early 1990s, and this book sets forth what she considers the most important elements of state-of-the-art healing practices today. The text is organized into six parts: Part I, "Concept of Healing;" discussing the types, history, and future of healing, Part II, "Complementary and Alternative Approaches to Healing" focuses on these therapies and integrative health care; Part III, "Healing Modalities;" has 10 chapters about the theory and practice of selected healing modalities such as acupuncture,
