Adapting to Campus Climate Change: Using Moodle to Teach Increasing Class Populations

SCIL Works 2013
San Marcos, CA
February 1, 2013
Main Objectives

- Describe the process of moving from in-person library instruction only to a combined model of both in-person and virtual instruction.

- Demonstrate how to address increasing class sizes and space constraints effectively and efficiently by using a campus learning management system for in-class activities as well as virtual instruction.

- Present examples from one general education course and a model for sharing lessons and activities.

- Discuss opportunities for assessment.
CSUN Background

California State University (CSU)
- 23 campuses
- Students: > 400,000
- Faculty & Staff: > 44,000
- CSU Moodle Consortium: 9 active members

California State University Northridge (CSUN)
- Students: > 30,000
- Faculty: > 2,000
- Moodle became LMS in 2009
- Fall 2009 – early adopters
- Summer 2010 – campus LMS
Course Background

- Ecology and People (Biology 327) is a general education course that includes an information literacy component
- Enrollment has tripled - originally 30 students
- Class meets once a week - formerly twice a week
- Taught by Assistant Professor of Biology since Fall 2006

In-Person Library Instruction

• Two sessions
  
  – First session covered different sources of information (reliability, currency, authority, etc.), citing sources, and what constitutes plagiarism.
  
  – Second session covered how to locate relevant information and what tools the library provides and has access to in locating information for the purposes of course assignments.
Fall 2009 Changes

- Course available in Moodle

- Assignment guidelines require that two out of five sources are primary sources

- Class size doubles which requires class to be divided in half for library instruction sessions which are taught concurrently by two librarians
Library Instruction Collaboration

- Instruction outline and in-class activities created to ensure students receive same content

1. Types of sources – primary/secondary source activity using four pre-selected articles (handouts)
2. Evaluating sources – website evaluation activity using a website that students find in a Google search
3. Citing and plagiarism – MLA citation practice using website from previous activity
4. Assignment review – number and types of references and MLA citation style
5. Selecting a topic – current event sources
6. Finding references – demonstration and time to work on assignment
Fall 2010 Changes

- Librarians embedded in Moodle course in assigned Librarian role
- Primary and secondary article examples
- Link to webpage with course-specific library resources
- Ask A Librarian forum
Spring 2011 Changes

- Library Resources block

- Utilize Choice option for polling students on primary/secondary article examples and MLA citation activity to identify reference types
Spring 2011

Ask A Librarian
Spring 2012 Changes

- Class size triples which requires retooling the library instruction for a hybrid model – session one topics offered in Moodle as virtual instruction and session two topics covered in-person

- Created lessons and activities with content formerly covered in the first day of library instruction for students to complete before coming to the library
  - Lessons include both text and a video
  - Activities

<table>
<thead>
<tr>
<th>Name</th>
<th>Summary</th>
</tr>
</thead>
<tbody>
<tr>
<td>Primary vs Secondary Activity</td>
<td>This activity asks students to determine whether two sources are primary or secondary.</td>
</tr>
<tr>
<td>Evaluating Websites Activity</td>
<td>This activity asks students to evaluate whether or not a website is credible.</td>
</tr>
<tr>
<td>MLA Citation Activity</td>
<td>This questionnaire provides 5 MLA citation examples for various references and asks students to determine what each type of reference (i.e. book, journal article, etc.).</td>
</tr>
</tbody>
</table>
6 Library Resources

Before you come to the library, please read or watch the three lessons on library topics below and complete the corresponding short activities. When you come to the library, we'll briefly review the three activities and then start searching for sources for your assignments.

Lessons
- Types of Sources
- Evaluating Websites
- Citing Your Sources (MLA)

Activities
- Primary vs Secondary Activity
- Evaluating Websites Activity
- MLA Citation Activity
- Ecology and People Library Resources
- Ask A Librarian
Fall 2012 Changes

- Course meeting time changed to once a week instead of twice a week which necessitates class being divided in half for library instruction sessions which are taught by one librarian for half of the class meeting time.
Current Library Instruction Design

- Existing in-class exercises have been adapted to online modules created in Moodle

- All activities have an online assessment component
Model

- Storage of modules for easy access
- Ability to import modules into a campus learning management system
- Develop a suite of modules for use in any course providing general information literacy instruction
- Support the university’s growing number of hybrid and online classes
Library Lesson Repository

This repository provides access to tutorials, lessons, and question sets that can be used in Moodle or during in-class instruction. The question sets are available in two formats:

- Questionnaire - this is a type of Moodle activity that can collect answers without affecting course grading, making it a good choice for courses where librarians are embedded.
- Doc - this is a Microsoft Word document that has the questions (and answers for multiple choice questions) that can be used in class or to populate other quizzing software (SurveyMonkey, Poll Everywhere, clickers).

As a guest/student, you are free to view and access the material here. If you would like to import a lesson, tutorial, or question set directly into your Moodle class, please email Anna Fidgeon or Laurie Borchard to be added as a TA to this course.

For more assistance with library instruction for your class either in Moodle or in-person, you can contact your library subject specialist and/or request an instructional session for your class to familiarize students with research techniques and sources.

🔗 Guide to Importing Resources from the Library Lesson Repository
Future

- Online assessments coupled with each activity are a potential means of assessment on both the course and program level
  - Course level – assessment each semester for the same course
  - Program level – assessment each semester for different courses in the same program
  - Comparison of assessments across disciplines
